### Circular Motion Problem Solving

A penny, placed on a spinning record, rotates at  $33 \frac{1}{3}$  revolutions per minute when it is placed 10 cm from the center of the record (mass of penny = 25 grams) a) What is the tangential and angular speed of the penny as it moves around the center of the record? T

### PSI AP Physics I - Center For Teaching & Learning

It accelerates uniformly to 78 revolutions per minute with an angular acceleration of  $20 \text{ rad/s}^2$  Through what angular displacement does the record move during this period? 29 What is the angular acceleration of a record that slows uniformly from an angular speed of 45 revolutions per minute to 33 revolutions per minute in 31 s? Homework 30

### Revolutions a Minute - City University of New York

I got the idea to do this from reading 33 Revolutions a Minute, a history of protest songs by Guardian critic Dorian Lynskey (thanks to Prof Gerald Meyer, who gave me the book as a gift) As you may be aware, the hit version of “Born” is an example of a song where music and lyrics—and to a certain extent, verse and chorus—clash Since

### Velocities

The quantity 45 revolutions per minute is another way of expressing the rate at which the point on the record is moving We can obtain the angular velocity from it by remembering that one complete revolution is equivalent to 2 radians
